3-3-3 Sovereign SaaS & Subscription Portfolio Roadmap

838 Repositories Scanned Across 8b-is (298), standardgalactic (300) & peterlodri-sec (240) • October 29, 2026

Executive Thesis: Across 838 repositories in the three organizations, the fastest route to durable, low-support recurring revenue is to monetize the products that already have working builds, deterministic tests, live Cloudflare/NixOS hosting, and a shared Stripe + Ed25519 Sovereign License (**vkd_sk_***) checkout rail at **entheai.com/api/stripe/checkout**. Every purchase routes through the 4-Burner Sovereign Hearth (50% Operations / 25% R&D / 15% Family Hearth / 10% Hardware Reserve).

2. Organization Breakdown & Why Each Wins Fast

Org 1 — 8b-is (Consumer Hearth & Developer Velocity):
• **1A. OmniCooker (zenUltraCooker v2.2.0):** Built specifically for **Ma, Dra, Trisha, and Alex**. Solves the real-world appliance fault (Wall Oven offline → auto-routes every step to the working Countertop Air Fryer), tracks 15+ pantry & non-food household essentials (paper towels, dish soap, foil, trash bags) with expiry countdowns, prices baskets across Walmart/Aldi/Kroger/Meijer/Whole Foods (ZIP 44256), and checks out via Apple Pay, Google Pay, or Stripe.
• **1B. CrabCC & Smart-Tree Pro:** 271 GitHub stars; saves developers $50–$200/mo in Claude/Cursor token spend for $19/mo.
• **1C. Aye-I / EntheAI Hybrid Coding Pass:** Already powers the live Stripe/AgentMail/Ed25519 monetization backbone.

Org 2 — standardgalactic (Publishing, Research & Verifiable Compute):
• **2A. Memnet & Lovetta Press Patron Pass:** Serialized fiction, audiobooks, and *The Residue of Proof* interactive research essays.
• **2B. Exegesis.tv Scholar & Corpus API:** 625,000+ indexed verses with semantic vector search and synthesis.
• **2C. Spherepop OS & Warrant Canary Cloud:** Deterministic replayable state pops + signed cryptographic warrant canaries.

Org 3 — peterlodri-sec (Executive Finance, AI Cost Control & Security):
• **3A. Zeno Pocket CFO & Dra CEO Helper:** Sub-second voice-to-ledger expense logging, Kintsugi SHA-256 hash-chained audit trail, and Dra's Warren Buffett 5-to-25 Rule Focus Engine.
• **3B. Portail + Kompress-Ultra Router SaaS:** 5-stage prompt compression + local/cloud LLM routing with hard token budgets.
• **3C. Cloak-Fetch & FieldFeed Intel Stream:** Browser-grade TLS/JA3/HTTP2 fingerprint fetches for resilient data pipelines.

3. 90-Day MRR Trajectory & 4-Burner Hearth Allocation

Milestone	Target Subscribers across 3-3-3	Est. Monthly Recurring Revenue (MRR)	15% Family Hearth Allocation
